ABOUT ME

Detail-oriented independent Workday Integration Developer with close to 3 years of experience in designing, building, and supporting Workday integrations and reports. Proficient in Workday Studio, EIBs, Core Connectors, Extend and custom API development. Skilled in troubleshooting and real-time problem-solving, with a strong focus on security and compliance. Excellent collaborator with experience in understanding and addressing business needs through effective HRIS solutions.

WORK EXPERIENCE

ANALYST CONSULTANT

2022-2025

COGNIZANT WORKDAY PRACTICE

- Worked on AMS integrations, streamlining processes and improving data flow between systems.
- Owned and managed Workday integrations and reports, ensuring seamless operation and support.
- Designed and implemented integrations using EIBs, Core Connectors, and Workday Studio.
- Developed custom reports and created API clients to pull report data, performing thorough API testing with Postman.
- Worked on private SOAP APIs and developed studio integrations from scratch, ensuring robust solutions.
- Conducted detailed analysis and root cause analysis (RCA) to troubleshoot and resolve issues efficiently.
- Collaborated closely with HRIS and business users to understand pain points and provide effective solutions.
- Documented requirements, integration designs, and solutions, ensuring clarity and alignment with business objectives.
- Designed and built security groups for integrations and reports, ensuring accurate provisioning and compliance.
- Performed unit testing and supported QA testing to ensure high-quality deliverables.
- Developed payroll integrations using PICO for time tracking and time-off, ensuring accurate and compliant data exchange with third parties.
