Profile Summary

With a rich experience in the field of consultancy, I have honed my skills in identifying, documenting, reporting, and tracking resolutions. I have managed the Verint tool for employee scheduling and used excel to manage test cases and defects. I have a knack for understanding complex requirements and translating them into test scenarios, test planning, and test execution. I have consistently delivered quality results within established timelines and have made improvements in test approaches to minimize elapsed time in testing. I have conducted meetings and knowledge transfer sessions for teams and assisted team members with issue resolution and tracking. I have also gained experience in Selenium tool for process automation and created a chatbot using Microsoft Teams for automation purposes.

Key skills

- Java
- Test Cases
- Test Planning
- Test Execution
- Test Scenarios
- Manual Testing
- Automation Testing
- Smoke Testing
- Sanity Testing
- Testng
- Cucumber
- Jenkins
- Selenium
- Selenium Webdriver
- Testng Framework

Projects

51 Months

Humana

- Led test automation initiatives for Humana's health insurance web applications using Selenium, Java, and TestNG, improving testing efficiency by over 40%.
- Developed and maintained a comprehensive Page Object Model (POM) framework with TestNG annotations, facilitating easy test creation and improving reusability.
- Automated test cases for critical workflows such as claims processing, billing, and policy management, reducing manual testing efforts significantly.
- Integrated automation scripts into CI/CD pipeline using Jenkins, enabling continuous testing for faster feedback.
- Collaborated with cross-functional teams to discuss requirements, share test coverage reports, and ensure a seamless release process.

48 Months

Daimler

- Led a project team for the Daimler project, delivering it ahead of the deadline and within the allocated budget, resulting in a 15% cost savings.
- Served as the primary point of contact for the Daimler project, ensuring seamless communication between stakeholders and team members, resulting in a 20% increase in customer satisfaction.
- Implemented efficient project management techniques for the Daimler project, resulting in a 30% reduction in project timeline while maintaining quality and client expectations.
