- Experience in bug-tracking tools **Jira** and **Pivotal Tracker**
- Experience in **API Testing** using **Postman**
- Experience in **Mobile Application**(Android/iOS) and Web Application testing
- Experience in **SQL**
- Experience in **Core Java**.
- Experience in **Web Automation** with **Selenium**
- Knowledge of **Maven / TestNG**
- Experience in version control tools like **GitHub**

## WORK EXPERIENCE

- Working as **Software Test Engineer** in **Inscriptis pvt ltd** from 2021 (Dec) to 2023 (August).
- Working as **Software Test Engineer** in **Empirical Solutions** from 2019 (March) to 2021 (Dec)

## ACADEMICS

- B.E in **Computer Science** from O.P Jindal Institute of Technology (CSVТУ)

## PROJECTS

### **Project: CometChat**

**Domain:** Communication

**Testing Approach:** Manual Testing, API Testing, Mobile Testing, Web Automation Testing.

**Description:** CometChat is a communication platform that offers a wide range of features, including one-to-one messaging, group chat, voice and video calling, screen sharing, file sharing, push notifications, etc. These features are available across various platforms, like the Web, IOS, and Android. This is designed in a way so that it can be easily integrated into existing applications or websites.

### **Responsibilities**

- Involved in the development of Test plan, Test cases, and conditions to ensure.
- Understanding the functionality of existing applications and defining the overall test approach.
- As a Mobile and Web QA Engineer performed manual testing for a number of web projects such as React Web, Angular UI Kit, and Vue UI Kit across multiple browsers (IE, Firefox, Safari, and Chrome) and Android mobile apps like Android Java/Kotlin, React Native, Flutter UI Kit
- Testing the SDK and WebSocket connection.
- Testing the CometChat "Dashboard" for GUI testing
- Testing Android applications using simulators (browser stack) and also with real-time devices. Involved in Retesting, functional & Regression testing, and responsive testing

### **Project/Domain: E-Commerce**

**Description:** Web Based Application related to grocery products, this application is online grocery service delivery. Using this application users buy daily groceries, Household essentials, Branded foods, and skin care products online. Select a time slot for delivery and your order will be delivered to your doorstep

### **Responsibilities**

- Understanding Business requirements.
- Involved in writing test cases for the requirements.
- Understanding the functionality of existing applications and defining the overall test approach
- Involved in Smoke testing, Functional, Re-testing & Regression testing.
- Performed testing for GUI testing Testing simulators (browser stack) and also with real-time devices.
- Involved in Retesting, functional & Regression testing, and responsive testing
- Documentation preparations

## DECLARATIONS
