## Summary

---

To leverage my 3 years of experience as an **Angular and Java Full Stack Developer** to design, build, and configure scalable, high-performance applications that meet dynamic business processes and application requirements. I am committed to delivering innovative solutions, optimizing system functionality, and enhancing user experiences through my expertise in modern web and backend technologies.

## Experience

---

**Full Stack Java Developer**, Bahwan CyberTek – Chennai, India 2024 – Present

- **E-Governance – District Socio-Economic Abstract:** Contributed to the Maharashtra government's initiative to collect district-wide data by implementing and developing forms and Excel mapping to an Oracle database using Apache POI dependency.
- Developed the 'Manage Footer' feature in the DSA project, integrating API calls for dynamic content management.
- Developed backend and frontend using Spring Boot and Angular, ensuring seamless integration and performance.

**Full Stack Java Developer**, Mars Telecom Systems Pvt Ltd – Hyderabad, India 2022 – 2024

- **E-Governance – Works Module:** Implemented and developed forms using Spring Boot and REST APIs to facilitate project progression and ensure efficient data storage in the database.
- **E-Governance – Water Module:** Implemented an amnesty feature allowing customers to settle bills at a discounted rate with a 25% penalty reduction.
- Utilized Redis dependency for caching mechanism and improving data retrieval performance, enhancing system responsiveness.
- Experienced in deploying Java web applications with Apache Tomcat and adept in Angular for dynamic frontend development, ensuring seamless user experiences.

**Full Stack Java Developer Intern**, Revature – Chennai, India 2022 – 2022

- **Pictorial Dictionary:** Developed a role-based application utilizing Java and Spring Boot, where users can search for keywords, prompting the display of corresponding images fetched from a MySQL database. Implemented distinct user and admin functionalities for managing content and permissions during my internship.
- Utilized Java and Spring Boot to develop robust, scalable, and efficient backend solutions, ensuring seamless alignment with project requirements and delivering high-quality outcomes.
- Excelled as a Full Stack Java Intern, showcasing expertise in frontend development with Angular, employing Typescript, HTML5, and Bootstrap to craft dynamic user interfaces.

## Technologies

---

**Front End:** Angular, HTML5, CSS3, Typescript, Bootstrap

**Back End:** Java, Spring Framework, Hibernate, Spring Boot, Spring MVC, ORM Framework, JDBC, Spring Data JPA, Web Services, REST API, JUnit, Micro Services, Spring Cloud, Redis

**Tools:** Eclipse, Postman, MySQL Workbench, Github, Git, Maven, Apache Tomcat, VS Code, SQL

**SDLC Methodologies:** Waterfall, Agile Methodology

## Education

---

**Vignan Lara** 2018 – 2022

- B. Tech in Electronics and Communication Engineering, GPA : 7.5
